

ATI FirePro™ V3750

Workstation Graphics Accelerator

Accelerate Your Creativity

- **Mid-range performance**
- **Entry level price**
- **Advanced display output capability**
DisplayPort and Dual-Link DVI

Accelerate Your Creativity

Introducing the ATI FirePro™ V3750 workstation graphics accelerator from AMD. Whether for engineering or digital content creation, the ATI FirePro™ V3750 workstation graphics accelerator is highly reliable and loaded with visionary innovations that give you extreme productivity.

Application Performance Leadership

Based on a new-generation GPU with 320 unified shader units, the unique ultra-parallel processing architecture of the ATI FirePro™ V3750 workstation graphics accelerator allows for intelligent management of computational resources to automatically direct horsepower where needed. The end result is a processing experience that means that you can enjoy superior shader performance or considerable improvement in modelling performance for your 3D creation.

Assurance of Reliability

ATI FirePro™ workstation graphics accelerators support the standards that matter, like Microsoft® DirectX® 10.1, OpenGL 3.0, and Full Shader Model 4.1. Now you can enjoy great performance, scalability, and reliability on the latest standards.

Visionary Innovation

ATI FirePro™ workstation graphics accelerators also feature AutoDetect technology—which automatically identifies when you've switched to a new application. As such, your system can automatically update driver settings to configure them for ideal performance on the new application—helping you get maximum productivity for the exact application you're using at the moment.

Finally, ATI FirePro™ workstation graphics accelerators also offer a full 30-bit display pipeline, which means you can enjoy more than 1 billion colors¹. Plus, with native multi-card support, you can use up to four displays being driven by two ATI FirePro products in the same workstation.

How can ATI FirePro™ workstation graphics accelerators give your designs an edge? They let you focus on creating, not waiting.

¹ 30-bit monitor required for full 30-bit display (10-bit per RGB component). ATI FirePro™ 3D graphics card can display over one billion colors when attached to 30-bit displays.

Average of all eight SPECviewPerf 10 tests using Nvidia published scores. http://nvidia.com/object/fo_11761.html

ATI FirePro™ V3750

Workstation Graphics Accelerator

Strong Performance at Entry Level

With 256MB of dedicated on-board memory, 320 unified shader units, and priced for the masses, ATI FirePro™ V3750 delivers unheard of and outstanding price performance at the entry level. Affordable near mid-range performance is no longer an oxymoron.

ATI FirePro™ Product Comparison	ATI FirePro™ V3700	ATI FirePro™ V3750	ATI FirePro™ V5700	ATI FirePro™ V7750	ATI FirePro™ V8700
Graphic Processing Unit
